

LA RICOSTRUZIONE DEGLI EDIFICI DI CULTO DOPO IL SISMA 2016: SEMPLIFICAZIONI NORMATIVE E QUALITÀ DEGLI INTERVENTI

ANDREA CROCIONI, MARIA PREVITI

Ufficio Speciale Ricostruzione – Regione Marche

andrea.crocioni@regione.marche.it, maria.previti@regione.marche.it

Abstract.

The paper analyses the regulatory framework and the activities related to the repair and restoration of worship buildings as part of the reconstruction efforts following 2016's earthquake from the Ufficio Speciale della Ricostruzione della Regione Marche perspective. The office, as a party involved in the approval and consent procedures is in the unique position to provide clear and informed insights by assessing the overall process, from the planning phase and the challenges encountered to the effectiveness of the actions implemented in comparison to the results achieved, aiming to offer key points to consider and reflect upon for better quality interventions in the historical built environment.
